

SWS3009 Robotics and Deep Learning 2026
Baseline Evaluation

1. The Baseline Evaluation (“Evaluation”) will take place on Friday, 17 July 2026, from 9.30 am until around 6.30 pm.
2. The Evaluation will take place at the **Embedded Systems Teaching Lab 2**, according to the following timing:

Running Time	Team Number	Reporting Time
0930	4	0915
0950	2	0935
1010	3	1055
1030	15	1015
1050	10	1035
1110	6	1055
1130	7	1115
LUNCH		
1430	13	1415
1450	1	1435
1510	8	1455
1530	14	1515
1550	5	1535
1610	11	1555
1630	12	1615
1650	9	1635

3. All teams are to arrive at **Embedded Systems Teaching Lab 1** at least 15 minutes ahead of their running time, as shown in the “Reporting Time” column above.
4. Only the teams who are currently running the Evaluation or are within their reporting times are allowed to be at Embedded Systems Teaching Lab 1. **All other teams are to wait at Makers@SoC.**
5. If a team is late, no extra time will be given. **If a team misses its time slot, it will not be given another time slot and the team will get 0 marks for the Evaluation.**
6. Each team has 15 minutes to navigate around the maze and find and identify all eight images of cats.
7. Navigation will be by remote control. Teams are **not required** to implement autonomous control.
8. You will not be able to see your robot or the area in which it is.

9. The **species** of the cat **must be printed** on the console, or user interface as identified by the deep learning model. If the evaluators cannot see the species of the cat on the console, no marks will be awarded.
10. After finding all the cats, the robot should be piloted back to the starting point.
11. After 15 minutes the run will be terminated, regardless of how many cats you have found.
12. Scoring:

Aspect	Marks
Cats	40 (5 marks per cat)
Speed	Between 5 to 20 marks if you return to the start before the end of the 15 minutes. Final mark will depend on your speed ranking. 2 marks if you do not complete the course within 15 minutes.
Creativity	10
TOTAL	70 marks maximum
